FDD Abstract of [REDACTED]

1951 EXPORT PLAN (16 pp; German; 31 Oct 1951)

[REDACTED]

25X1X

This document consists of an analysis of the GDR Export Plan as of 30 September 1951. The first page is a table with the following headings: Branch of industry; proposed plan for 1952, based on May 1951 prices?, based on probable actual prices; 1951 Plan quota; probable fulfillment of the 1951 Plan as of 31 December 1951; probable difference between results as of 31 December 1951 and quota; items within each plan group difficult to fulfill a) because of production difficulties, b) because of marketing difficulties, a) plus b). All amounts are given in thousand rubles.

The second page gives a breakdown by industry of items that are difficult to fulfill because of production difficulties.

The third page gives the groups of items that will not be realized in the export plan because of delivery difficulties. The groups are: machine-building, electrical goods; precision and optical instruments, and steel, sheet and metal products.

The next three pages list 35 specific items in the machine-building industry which cannot be delivered because of production or material difficulties. The next five pages give a more detailed analysis of the reasons for delivery difficulties for each type of machine.

The next two pages list items in the electrical engineering industry that cannot be delivered and gives specific reason for inability to deliver. The last three pages give the same information for the chemical industry.
